

The US Lacrosse Coaching Education Program

Our mission:

Provide you with world-class training and educational resources to help you be the best COACH you can be and to equip you to make a positive impact on your players through the sport of lacrosse.

Building blocks:

The coaching education program takes a building block approach to training—the material in each level builds on the content in the previous level. The US Lacrosse coaching education committee feels strongly that all lacrosse coaches receive foundational training that reinforces the roots of the game, high levels of sportsmanship, and solid coaching theory.

Blended learning:

The coaching education program is also a blended learning experience—some knowledge is gained through convenient, online delivery methods, and other content is delivered at in-person clinics where coaches have the benefit of hands-on instruction and a certified trainer at their disposal.

Summary of Coaching Education Program prerequisites:
