

**Level 1 Instructional Clinic
Hosting Policies for Private Clinics
(Limited to coaches of a specific league or group)**

- **Leagues or clubs wishing to educate their coaches with the CEP should contact their local chapter first about hosting a clinic.** There are multiple benefits to working through the chapter for the clinic. US Lacrosse has methods in place to simplify the process so that a league may send their group of coaches to a chapter-sponsored clinic.
- **If proceeding with a private clinic, a deposit of \$3,400 is required for a combined boys' and girls' clinic and \$2,100 for a single game clinic. * A 10% discount will be applied if all coaches will be members of US Lacrosse. This covers certified trainers' expenses and fees, clinic materials and workbooks, administration, and certificates.**
- **Leagues must secure appropriate site, site coordinator, and communicate a lunch plan in accordance with the Hosting Information Handbook**
- **Group's participants MUST pre-register online at www.uslacrosse.org. US Lacrosse will provide this service, hosts will be given regular updates on registration.**
- **All attendees must fill out a waiver, which must be returned to trainers prior to start of a clinic if USL membership is not required.**
- **Scheduling and trainer assigning priority goes to chapters hosting clinics.**
- **Intent to Host forms and site information worksheets are due according to stated timelines for clinic hosting.**
- **Leagues may charge a registration fee but it may not exceed the standard US Lacrosse registration fees.**

**If registration exceeds 75 participants, an additional \$500 will be billed to the organization to cover the cost of additional trainers in order to meet adequate trainer-to-coach ratios. If the group feels they would be unable to do this, the attendance numbers may be capped.
