

**Overview** Practice planning is a coaching art form that develops over many years of trial and error with your programs and players. Our goal with this document is to give coaches a guideline for what should be included in a practice plan at the age level they are coaching. Be aware that as a coach it is your job and privilege to develop, design, and implement the practice plans in a manner that fit your assessment of your team and goals. Be sure to innovate through practicing on a daily basis and looking for ways to get better at this coaching art form.

**U15 Player Development** Players at the U-15 Level fall under the advanced level of “Training to Train” stage of LTAD (Long Term Athlete Development Model) which states this phase of athlete development should spend the time to develop the athletes overall physical capacities (focus on aerobic conditioning and fundamental movement skills). In addition a 60:40 ratio of practice to competition is recommended and moving towards faster paced games and game play.
